Subject: Internship Feedback – Miss Priyanka Bana

We are pleased to share our feedback on **Miss Priyanka Bana**, a Computer Engineering student of **Vishwakarma University, Pune**, who is currently working as an intern with **BuySellTips Financial Research Pvt. Ltd.** Throughout her association with us, she has proven to be an excellent intern and a valued member of our technical team.

Priyanka has worked across software development, data engineering, automation and financial data research, building Python and Java-based solutions. Her work has included automated pipelines for FINRA bond data, SEC EDGAR and 13F filings, NASDAQ and London Stock Exchange news, sanctions datasets, and the SentiScore news and press release integration, using tools such as AWS, Docker, PostgreSQL and REST APIs.

What sets Priyanka apart is the speed with which she adopts new technologies. She is a very sharp learner, and her ability to understand a problem and its requirements is excellent. She does not wait to be taught; she independently explores new concepts and tools, learns them on her own, and puts them to practical use in her work. This self-driven approach has allowed her to take on unfamiliar assignments with confidence and deliver them effectively.

Her grasp of core technical concepts is very clear, which is reflected in the quality and reliability of her solutions. She approaches each task with curiosity, discipline and a genuine interest in understanding how things work, and she has consistently put in her best effort to build both technical and domain knowledge.

We are very satisfied with her performance and are confident that she has a bright future in the technology field. We strongly recommend her for any role or opportunity she pursues and wish her every success in her career.

Sincerely,

Hiren Patel
Chief Technology Officer (CTO)
BuySellTips Financial Research Pvt. Ltd.
